

New Jersey Nanotechnology Consortium

We're bridging the gap between nanotechnology research and commercial products.

Today.

The New Jersey Nanotechnology Consortium is leading the effort to make nanotechnology a part of everyday life. The NJNC offers cost-effective access to world-class fabrication facilities, including the only sub-micron, 200mm wafer fabrication facility dedicated to nanotechnology development in the United States. We have the resources, expertise and a wealth of intellectual property to take you from concept to commercialization fast.

Taking Nanotechnology from Concept to Commercialization
